Reader’s poll: The album cover dates from 1939, when Columbia Records art director Alex Steinweiss decided his label’s offerings might find a wider audience with some added visual appeal. Since the very first Steinweiss design, an album of showtunes by Rogers and Hart, album covers have represented the apotheosis and nadir of graphic design, and have touched all points in between. Last weekend we asked our readers to select the best album covers of all time. In the age of the digital download, the album cover is sadly a lost art – which probably explains why 90 percent of the albums that readers selected come from the 1960s and the 1970s. Here are the Top 5:

Harry Beck and London’s iconic Tube map

By Dan Carrier
The tube map almost never made it out of its creator’s notebook. The designer was Harry Beck, a young draughtsman who drew electrical circuits for the Underground. Beck’s biographer, Ken Garland, befriended him in 1935, and before the designer’s death in 1974 he uncovered the story behind the creation of what Beck called “the diagram”.

“As a native of a small village in Devon and moving to London to study art, I found the metropolis impossible to navigate,” Garland recalls. “I would get on the tube and see Harry’s diagram. London suddenly made sense, and so I asked people at the college if they knew who the designer was.”

Garland was told that HC Beck could be found at the London Transport Board. With money tight, the board’s employees could be laid off at short notice. Beck, then 29, had been employed as a “temporary” since he first started in 1925. While at work drawing an electrical circuit diagram, he had an idea: a new map that would be really confused by the idea, no one will understand it. ’ ”

The publicity chiefs replied: “You can’t do it like this – the public will feel it is not the right way to understand it.” His idea was dismissed as ridiculous. But as work in his old office began to pick up, his former colleagues remembered him: they had appreciated his work on in the tube workers’ orchestra and, in 1933, he was back on board and pitching his idea again.

Garland continues: “Beck would not take no for an answer. He went back with a revised copy, and finally they agreed to produce a small print run of 1,000 fold-out versions, put them in central London train stations and ask passengers for comments.

One of the publicity team went to Piccadilly Circus and asked staff if anyone had been interested in the diagram. The maps had gone within an hour. Beck had been proved correct, and the publicity department arranged for a print run of 750,000.”

Harry Beck was good news for the tube. Passenger numbers had leaved off, and they needed a bright idea to sell the Underground. “Beck’s map was the catalyst,” says Garland.

More than a million were in circulation within six months of being commissioned. Wall maps were next: Beck was paid a further five guineas to produce one. But for something that is so recognizable as a piece of ‘trademark’ art, Harry Beck was not, according to Garland, part of the modernist movement that was sweeping through the psyche of painters, sculptors, other designers and filmmakers of the period. “He was not influenced by contemporary art,” says Garland. “He knew little or nothing about it.”

“The diagram,” as Beck insisted it was called, was a lifelong obsession. As new routes were added, Beck would tinker with his design. He was constantly seeking to improve it, and when the publicity department realized they had a hit on their hands, he had to fend off “helpful” suggestions from tube bosses.

“Beck embarked on a letter-writing campaign to take back control of his life’s work. It was fruitless. London Underground accepted no argument that the current map was an inferior design.”

But for something that is so recognizable as a piece of ‘trademark’ art, Harry Beck was not, according to Garland, part of the modernist movement that was sweeping through the psyche of painters, sculptors, other designers and filmmakers of the period. “He was not influenced by contemporary art,” says Garland. “He knew little or nothing about it.”

The publicity chiefs replied: “You can’t do it like this – the public will feel it is not the right way to understand it.” His idea was dismissed as ridiculous. But as work in his old office began to pick up, his former colleagues remembered him: they had appreciated his work on in the tube workers’ orchestra and, in 1933, he was back on board and pitching his idea again.

At the time, the maps of the network showed individual lines run by different railway companies. It was geographically correct, but impossible to read. The lines snaked all over the place. The first map, published in 1908, betrayed the fact that different operators were competing with each other and could not agree where the Underground ended.

Harry laid out London’s Underground routes as he would a circuit board, and took it to the publicity department. He told Garland: “Looking at the old map of the railways, it occurred to me that it might be possible to tidy it up by straightening the lines, experimenting with diagonals and evening out the distances between stations.”

“He was modest,” recalls Garland. “He’d quietly taken the diagram to them and said: ‘You may be interested in this.’ The publicity chiefs replied: ‘You can’t do it like this – the public will feel it is not the right way to understand it.’ He was modest.”

Beck embarked on a letter-writing campaign to take back control of his life’s work. It was fruitless. London Underground accepted no argument that the current map was influenced by his work, or that it was an inferior design. When Beck fell ill, his piles of sketches were destined for the dustbin, but Garland stepped in and saved them – recognizing that they were crucial to understanding its development. Among the papers Garland saved was the first pencil sketch of the diagram, now at the V&A Museum.

“The diagram’s iconic status should not be overlooked,” says Garland. “It has touched so many people. The tube diagram is one of the greatest pieces of graphic design produced, instantly recognizable and copied across the world. His contribution to London cannot be easily measured, nor should it be underestimated.”
